**Engineered and crafted in Tasmania,  
Kings Outdoor Living's outdoor umbrellas  
are strong and durable, and are designed to  
handle the toughest of Australian conditions.**

These permanent, wind-resistant structures are fully customisable, and are designed to be used anywhere and everywhere, from pool areas and patios to parks, schools and restaurants.

## CANTILEVER UMBRELLAS

For Maximum Coverage

Our commercial-grade cantilever umbrellas are an elegant and practical solution for residential and commercial settings, where clear space is needed underneath. This premium product is fully-welded with structural fittings, and is engineered to withstand high winds, whilst providing the maximum amount of useable shade.

## CENTRE POST UMBRELLAS

For Strength and Durability

Especially suited to extreme wind environments, our centre post range is our strongest design. Accentuate your private residence or leave a lasting impression on your guests, with these fully customisable umbrellas that are perfectly suited to group seating areas.

## FULLY CUSTOMISABLE

Customise your umbrella to your business or home, with a variety of sizes, fabric colours and metal applications available. For a truly bespoke outdoor living area, work with our in-house engineers and designers to create an entirely custom product, or link together more than one umbrella with our 'standard linked' range.

Engineered in a variety of sizes that will suit residential through to commercial uses:

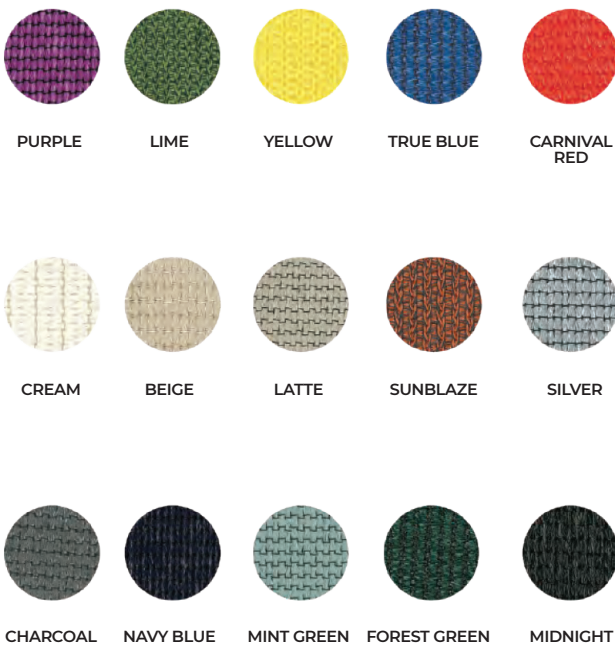

**2 x 2, 2.5 x 2.5, 3 x 3, 3.5 x 3.5,  
4 x 4, 4.5 x 4.5, 5 x 5, 5.5 x 5.5,  
6 x 6, 7 x 5**

# WATERPROOF CANOPY MATERIAL

We use Serge Ferrari Soltis Proof 502 PVC vinyl for our waterproof canopies, which is an extremely strong yet flexible material that is available in 40 colours, and has a unique satin finish that will give your umbrella an ultra-modern, high-end look. Soltis Proof 502 is a state-of-the-art material that does not tear or scratch, resists dirt and UV damage, and blocks 100 per cent of UV rays. But to give our customers peace of mind, all of our waterproof canopy materials include a 10-year UV warranty.

**10-YEAR**  
UV WARRANTY

# OPEN-WEAVE SHADE MATERIAL

Alnet EXTRABLOCK™ is our chosen shade cloth thanks to its strength and stability, as well as its high-performance in UV protection and fire retardation. With UV block of between 95.3 and 97.6 per cent (depending on the colour you choose), this premium material provides the best protection of almost any other shade cloth on the market. Choose from a variety of 15 EXTRABLOCK™ colours.

# MEASUREMENTS

## Standard Canopy Size (a) (in m)

2 x 2, 2.5 x 2.5, 3 x 3,

3.5 x 3.5, 4 x 4, 4.5 x 4.5,

5 x 5, 5.5 x 5.5, 6 x 6, 7 x 5

\*\* Custom Sizes made to order

## Entry Height (b) (in mm)

2200 - 3300 max

## STRUCTURE COLOUR

All of our frames employ the use of marine-grade 316 stainless steel and alloys that comply with the highest Australian standards. Make your Kings Outdoor Living umbrella your own by customising the colour of your steel frame. We utilise the full Dulux colour range, which is re-enforced with warranty grade advanced durable polyester thermosetting powder, so you can be assured of long-lasting, UV-stabilised surfaces to handle the harsh Australian sun.

Make the most of your outdoor umbrella by customising it with heat and lighting elements, which will maximise your enjoyment of the space and enable you to use it year-round.

## HEATSTRIP

Heatstrip® is a world leader in outdoor heating. We offer their full range, which includes a selection of stylish, slimline electric radiant heaters, with a choice of hard-wired and remote-control operation.

HEATSTRIP®   
OUTDOOR HEATING RANGE

## LIGHTING

Speak to our sales team about creating a bespoke LED lighting system. With the option of adding LED lighting in a range of configurations and colours (which can all be controlled remotely), the sky is the limit when it comes to ambient light fittings that create inviting, comfortable environments.

## Kings patent-pending gutter system is an innovative way to create neat rows or grids of our centre post or cantilevered umbrellas.

Our linkable gutter system has been engineered to allow for maximum strength and a classic, clean look when joining umbrellas, helping you to make total use of your space. The straight, clean edges remove the traditional curve in the umbrella's perimeter, eliminating any drips and gaps in the shade when joining them together. Our large engineered tubular construction has done away with messy wires and flaps of vinyl, allowing for discreet installation of lighting and heater cables, whilst also maintaining our classic, minimal look.
